ABOUT ME

Frontend Web Designer & Coder

I am a 15-year-old frontend web designer and coder from Dhaka, Bangladesh. Currently, I am a student in class 9 at Engineering University School & College. I am passionate about computer technology and aspire to become a software engineer and entrepreneur, with a long-term goal of founding my own software company. In addition to my studies and coding projects, I also run a YouTube channel where I share insights and tutorials on technology, reinforcing my dedication to the field. I am eager to contribute my growing skills and enthusiasm to exciting projects on Upwork.
